[^] MSCI World ex Australia Net Index (100%)

Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To maximise risk-adjusted, long term active returns from a diversified portfolio of global securities while actively incorporating a range of Environmental, Social and Governance (ESG) investment criteria and reducing exposure to carbon intensive companies relative to the benchmark. The option aims to outperform the MSCI World (ex Australia) Index over rolling four year periods before fees and taxes.

Investment strategy

Acadian utilises a systematic multi-factor investment approach, while integrating a range of ESG criteria, to select stocks. Acadian will target a reduction in weighted average carbon intensity (WACI) of the portfolio relative to the MSCI World ex Australia index. The option will also aim to maintain a positive active exposure to stocks considered to be contributing to environmental and social objectives as defined by the UN Sustainable Development Goals. The option does not hedge currency risk.

Investment category

Global Share

Minimum suggested timeframe

At least 7 years

Investment ranges
